

COMPANY OVERVIEW

C3 Build Group is a government professional services firm supporting federal, state, and local agencies and their contracting partners. We provide program and project management, management consulting, acquisition and procurement support, administrative services, research and analysis, and construction and capital-project advisory. C3 emphasizes disciplined execution, clear documentation, responsive communication, and practical decision support. Our leadership's background in commercial construction and capital project delivery provides added insight when supporting infrastructure and facilities-related initiatives.

CORE CAPABILITIES

Program & Project Management Program coordination, PMO support, schedule monitoring, risk and issue tracking, stakeholder coordination, performance reporting, and project controls support.	Management Consulting Operational assessments, process improvement, business analysis, strategic-planning support, workflow design, management reporting, and SOP development.
Acquisition & Procurement Support Market research, acquisition-planning support, vendor research, requirements organization, procurement documentation, opportunity analysis, and proposal-coordination support.	Administrative Support Services Executive and program support, document control, records organization, meeting coordination, correspondence tracking, action-item follow-up, reporting, and workflow administration.
Research & Analysis Market and policy research, data collection, comparative analysis, opportunity intelligence, performance analysis, executive summaries, and decision-support reporting.	Construction & Capital Project Advisory Owner-side and program support, project coordination, schedule and progress monitoring, procurement support, scope and document review, risk tracking, construction administration support, and executive reporting.

SELECTED ENGAGEMENT TYPES

- PMO and project coordination support
- Acquisition research, vendor analysis, and procurement support
- Market research, data collection, and executive summaries
- Document production, formatting, proofreading, and quality control
- Program administration, meeting support, and records organization
- Capital-project monitoring, reporting, and owner-side support

POSITIONING PRINCIPLE Construction expertise is a differentiator without defining the company.

WHY C3

Disciplined execution — Organized workflows, clear ownership, and consistent follow-through.

Documentation & decision support — Clear status, risk, action, and priority reporting.

Responsive, lean operations — Adaptable support with minimal management burden.

Technology-enabled delivery — Faster research and consistent output with professional review.

Practical infrastructure insight — Leadership experience in commercial construction and capital projects.

Continuous improvement — Reusable processes, templates, and lessons learned.
